CRYPTOCURRENCY WORLD

Bitcoin, the leading digital currency by market capitalization, has grown in value by more than 10 times at certain points over the past year, but it has also seen significant plunges in value. Still, a number of cryptocurrencies have managed to come out on top.

In the world of virtual currencies, fortunes tend to move up and down quickly. The space is dominated by volatility above many other factors. These are the largest digital currencies.

1. Bitcoin

Bitcoin is the original cryptocurrency and it remains the go-to leader of the space. As of this writing, the market capitalization of the world's top digital currency is more than \$125 billion.

2. Ethereum

Ethereum, the digital token which prompted the rise of the initial coin offering (ICO), comes in second on our list of cryptocurrencies by market cap. It is significantly smaller than bitcoin; the current market cap is just shy of \$50 billion.

3. Ripple

The No. 3 slot goes to the much-hyped Ripple, with a total market capitalization of more than \$19.8 billion.

4. Bitcoin Cash

Bitcoin cash, comes in fourth in our ranking. The total market cap of this digital currency is about \$14.5 billion.

AURUM PRO

Crypto currency indicates a possible return of € 1,100 per day. According to the website, you only have to invest 20 minutes per day. You should always approach a trade carefully and do not expect too much at once. You can set yourself a limit on how much you want to earn on a weekly or monthly bas.

To become part of this event you need to have a certain amount. Below you will find the amount and currencies that affect our event.
